

We're proud to offer our customers a range of high-quality, eco-friendly composite products that are easy to install and durable. Our Apex line sets the standard for natural-looking, long-lasting decking, and flooring that requires minimal maintenance.

With an ultra-lightweight bamboo-foamed PVC core, Apex is easy to work with and install. Its protective cap is made from a resilient acrylic polymer coating. As a result, it's fade, scratch, and stain resistant. Additionally, Apex offers fire and slip resistance, making it a safe and secure choice for any outdoor space.

What's more, our Apex line is a sustainable choice that's designed to protect the environment. Using solar power in manufacturing and offering an eco-friendly alternative to timber prevents deforestation and premature deck replacement. We're committed to creating a better, more sustainable future for all.

So if you're looking for a reliable, high-quality decking or flooring solution built to last, look no further than Conway Flooring and Decking's Apex line.

HOW TO CLEAN COMPOSITE DECKING

- At Conway Flooring and Decking, we understand that maintaining your outdoor space shouldn't be a chore.
- Our composite decking products are designed to be exceptionally low-maintenance, requiring only light cleaning with standard household tools.
- We recommend using a high-pressure hose with a wide fan tip at pressures under 1500 psi to keep your composite decking looking great.
- Keep the hose at least 300mm away from the surface when spraying, and for the best results, use a hard-bristled broom and soapy water to scrub the boards while pressure washing.
- We recommend pressure washing your boards once a month to keep them looking clean and cared for.
- With Conway Flooring and Decking's composite decking products, you can spend less time worrying about upkeep and more time enjoying your outdoor space.
- Trust us to provide high-quality, low-maintenance solutions that stand the test of time.
