

DIAMOND TILE DATA SHEET

Conway Flooring is proud to introduce the latest innovation in vinyl tile - Diamond Core SPC.

Made with a rigid stone plastic composite core, this new range offers superior performance and durability compared to traditional luxury vinyl tiles.

Diamond Core SPC is much more stable with a calcium-carbonate-stone dust core and offers four times better dimensional stability than regular vinyl tiles.

This makes it an excellent choice for high-temperature environments, such as commercial spaces and homes with underfloor heating.

Choose Diamond Core SPC for superior performance and long-lasting durability.

DIAMOND TILE DATA SHEET

PRODUCT INFORMATION AND WARRANTY

Construction	Rigid core SPC – Stone Plastic Composite
Wear layer thickness	0.7mm UV scratch-resistant coating
Core thickness	6mm – average board density of 2000 kgs/m ³
Plank size	900 x 450 x 6 mm
Installation method	Easy Click Installation
Warranty	30 years Heavy Domestic / 10 years Light Commercial use
Waterproof	100%

HOW TO CLEAN VINYL

- After installation, it is recommended to clean the floor to remove loose dirt or debris that may have been caused during installation.
- Regularly sweep or vacuum the floor to remove loose dirt, but avoid using vacuums with a beater bar or electric brooms with hard plastic bottoms and no padding.
- Clean up spills immediately to avoid damage to the floor.
- Use a damp microfiber mop with clean water and a diluted floor cleaner to clean the floor as needed, but avoid using harsh cleaners or chemicals, abrasive scrubbing tools, detergents, or mop and shine products.
- Test any new cleaning agent on a small patch of the floor in an inconspicuous area.
- Avoid using harsh cleaners or any cleaner with an ammonia base.
- Allow time for the floor to dry after washing, as vinyl flooring may become slippery when wet.
- Immediately wipe up wet areas from spills, foreign substances, or wet feet to prevent slipping and damage to the floor.
