

## INFINITY DATA SHEET

CONWAY  
FLOORING & DECKING

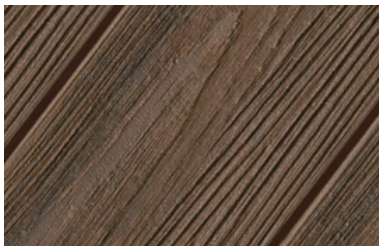

Infinity Bamboo Composite is one of the most rigid and durable co-extruded composite ranges.

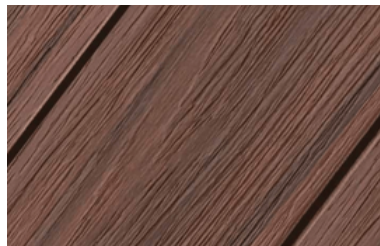

Infinity's resilient protective cap, made of advanced polymer, resists scratches, fade, mold, and mildew, making it exceptionally low-maintenance and easy to care for. And, because it's an environmentally friendly alternative to wood, you can enjoy the stain and slip resistance of Infinity while also reducing your impact on the planet.

Choose Infinity bamboo composite for ultimate durability and long-lasting beauty that you can enjoy for years.

## HOW TO CLEAN COMPOSITE DECKING

- At Conway Flooring and Decking, we understand that maintaining your outdoor space shouldn't be a chore.
- Our composite decking products are designed to be exceptionally low-maintenance, requiring only light cleaning with standard household tools.
- We recommend using a high-pressure hose with a wide fan tip at pressures under 1500 psi to keep your composite decking looking great.
- Keep the hose at least 300mm away from the surface when spraying, and for the best results, use a hard-bristled broom and soapy water to scrub the boards while pressure washing.
- We recommend pressure washing your boards once a month to keep them looking clean and cared for.
- With Conway Flooring and Decking's composite decking products, you can spend less time worrying about upkeep and more time enjoying your outdoor space.
- Trust us to provide high-quality, low-maintenance solutions that stand the test of time.
