

Naturally Beautiful with Unrivalled Strength and Durability.

Hardwood decking is a hugely popular choice for decks, big or small. It's an entirely natural product resulting from years and years of growth. Seen by many as the only 'real' decking option, hardwood decking timber does call for maintenance but is well worth the extra effort.

Origin: Southeast Asia
Plank Sizes: 90mm x 19mm and 140mm x 21mm

HOW TO CLEAN TIMBER DECKING

At Conway Flooring and Decking, maintaining your decking is an important part of keeping it looking great for years.

Here are some tips for keeping your decking clean and well-maintained.

- Regularly sweeping your decking is an easy way to prevent dirt and debris from building up.
- Use mild warm water and liquid dish soap solution for a more thorough cleaning.
- You can then use a stiff broom and scrubbing brush to clean your decking deeply.
- You can also use a specialty wood deck cleaner or a pressure washer with a wash brush attachment.
- If you're dealing with mold or algae on your decking. Then a ready-to-use concentrated disinfectant treatment is the best way to clean it. Simply spray the treatment onto affected areas and let it dry - there's no need to pressure wash or scrub beforehand.
- You can revitalize and maintain your decking with minimal effort, keeping it looking great for years.
- Trust Conway Flooring and Decking to provide the best possible solutions for your outdoor space. Choose our high-quality, sustainable products for a beautiful and long-lasting decking solution.
